

MOHAMMAD AAZIB KHAN

Lucknow, Uttar Pradesh • +91-9807174815 • aazib12j@gmail.com
github.com/Aazib-at-hub • linkedin.com/in/mohammad-aazib-khan/

Computer Science undergraduate with experience in software engineering, AI applications, and full-stack development. Proficient in Python, JavaScript, C++, and modern web technologies. Experienced in building production-ready applications, machine learning systems, browser extensions, and scalable backend services. Strong foundation in algorithms, data structures, object-oriented programming, and software design.

TECHNICAL SKILLS

- **Programming:** Python, JavaScript, C++, Java, SQL
- **Database Management:** SQL, DBMS fundamentals, Query optimization
- **System & Tools:** Git, GitHub, Docker, Postman, Google Cloud Platform
- **Web Technologies:** React.js, HTML5, CSS3, Tailwind CSS, FastAPI, Express.js, REST APIs
- **Concepts:** Data Structures & Algorithms, OOP, SDLC, Agile, Code review practices, CI/CD
- **AI & Machine Learning:** Deep Learning, Computer Vision, Attention U-Net, TensorFlow, PyTorch, Prompt Engineering, LLMs

EXPERIENCE

Freelance - Remote

November 2025 -Present

Tech Stack: Python, JavaScript, React.js, FastAPI, Express.js, MongoDB, MySQL, Git

- Built responsive frontends, backend APIs, authentication systems, dashboards, and database-driven applications.
- Gathered requirements directly from clients and translated business needs into scalable technical solutions.
- Designed and implemented REST APIs using modern backend frameworks and database technologies.
- Utilized Git and GitHub for version control, project collaboration, and deployment workflows.
- Delivered projects independently while managing development, testing, debugging, and client communication.

PROJECTS

Tabbed — AI Prompt Optimization Chrome Extension - [Link](#)

Tech Stack: JavaScript, Chrome Extension APIs, HTML, CSS, Prompt Engineering

- Developed and published an AI-powered Chrome Extension that transforms user prompts into structured and optimized instructions.
- Implemented prompt refinement workflows using JavaScript and browser APIs to improve AI-generated responses.
- Designed a lightweight and responsive extension architecture with focus on usability and performance.
- Managed the complete development lifecycle from design and implementation to public deployment.

AI Brain Tumor Segmentation using Attention U-Net - [Source Code](#)

Tech Stack: Python, TensorFlow/PyTorch, Deep Learning, Computer Vision, Attention U-Net

- Developed a deep learning model for automated brain tumor segmentation from MRI scans using Attention U-Net architecture.
- Implemented image preprocessing, augmentation, model training, and evaluation pipelines.
- Evaluated segmentation performance using Dice Score and Intersection-over-Union (IoU) metrics.
- Analyzed the impact of attention mechanisms in improving segmentation accuracy for medical imaging tasks.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science & Engineering

Aug 2023 - June 2027

Khwaja Moinuddin Chishti Language University, Lucknow

Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Artificial Intelligence, Machine Learning

SKILLS & ACHIEVEMENTS

- **Core Competencies:** Requirements gathering, Functional-to-technical translation, Process documentation, Analytical problem solving, Cross-team collaboration, Adaptability to new technologies.
- **Communication:**
 - Proficient in English communication with the ability to understand and adapt to various dialects, ensuring effective interaction in diverse settings. Strong written documentation skills.
 - Strong ability to translate technical concepts into clear, non-technical explanations.
- **Achievements:** Participated in hackathons, technical workshops, and software engineering events. Regularly explore AI, machine learning, distributed systems, and modern software development practices.

CERTIFICATIONS

Google Cloud Skill Badges | [Verify Here](#)

Jul 2025 - Dec 2025

- Earned multiple Google Cloud Skill Badges through hands-on labs and practical cloud challenges.
- Demonstrated knowledge of cloud infrastructure, data management, AI/ML services, networking, security, and cloud-native application development.

Hacktoberfest 2024 – Level 4 Finisher Badge | [Verify Here](#)

October - 2024

- Successfully completed Hacktoberfest 2024 through open-source contributions.
- Demonstrated proficiency in Git, GitHub workflows, pull requests, code collaboration, and open-source development.
